EDUCATION

Towson University

Bachelor of Science in Computer Science (3.89 GPA), Software Engineering Track

Towson, MD

May 2026

Relevant coursework: Object-Oriented Design and Programming, Linear Algebra, Statistical Methods, Web-Based Program, Software Quality Assurance and Testing, Programming Languages, Mobile Application Development, Database Management Systems

TECHNICAL SKILLS

Programming Languages: Java, Python, C/C++, JavaScript/ES6, Rust, Kotlin, SQL

WebTech: HTML, CSS, Node.js

Frameworks/Libraries: Express.js, React.js, Tailwind, Mongoose, JUnit, Jetpack Compose, Java Swing

Databases: MySQL, SQLite, MongoDB

Developer Applications: Visual Studio Code, IntelliJ, Eclipse, Android Studio, Git, Postman

PROFESSIONAL EXPERIENCE

V8 Collectibles

Sales / Software Engineer (part-time)

Wilmington, DE

Spring 2026

- Analyzed data of sold comics
- Created listings of comics at competitive prices
- Developed a program to request information on a specific comic and display that data

PROJECTS

Rust LOLCODE Compiler

Fall 2025

Developed a fully functional compiler for a made-up "LOLCODE" programming language that was similar to HTML. Programmed in Rust, the compiler would take in a .lol file and convert it to HTML and open the converted file in the browser.

- Using Rust
- Included Syntax, Lexical, and Semantic analysis

EHIREUS Database Application

Fall 2025

Fully functional database application for the needs that the company Ehireus had (for academic purposes). The application supported CRUD operations using a simple GUI for all types of data the company needed to record (i.e., timesheets, clients, employees).

- GUI made using Java Swing
- MySQL used as RDBMS

Reddit Clone

Fall 2024

Developed a full-stack application which allows for people to create posts, comment on posts, up-vote/down-vote posts, and they are saved to a database. Users can also create accounts and login to the website.

- Using MERN stack (MongoDB, Express.js, React.js, Node.js).
- Deployed with Vercel

MOJK Stocks

Fall 2024

A full-stack application that uses Cheerio to scrape data from Yahoo.com/finance and displays information on potentially profitable stocks. Users can add stocks to their stock list, sign up, log in, and report bugs.

- Using MERN stack (MongoDB, Express.js, React.js, Node.js).
- Cheerio (node.js package) to scrape the data
